PERSONAL OVERVIEW

I am an analytical and collaborative problem-solver with experience in marketing and business strategy, product management, and client-facing projects. Through my education and work experience, I've cultivated an ability to communicate effectively across teams, adapt quickly to new areas of focus, and deliver impact by optimizing internal operations. My background in computer science allows me to translate complex technical concepts into clear business insights and deliver data-driven recommendations. I'm interested in management and technical consulting, sales engineering, and product management.
